MBA candidate building and evaluating reliable agent systems and implementing applied AI programs for real organizational workflows.

Education

Master of Business Administration | Expected May 2027
University of Massachusetts Boston
Selected coursework: AI Industry Applications Lab, Business Intelligence, Statistical Analysis for Managers

Bachelor of Arts, Psychology | 2026
University of Massachusetts Boston

Experience

AI Programs & Operations Coordinator | Current
Paul English Applied Artificial Intelligence Institute, UMass Boston
- Coordinate applied AI programs, workshops, outreach, and operational workflows across faculty, students, speakers, and external partners.
- Led operational planning for a Summer 2026 AI workshop series serving 30+ career advisors, revising workshop outlines, coordinating speakers, developing participant resources, and supporting delivery.
- Support the Applied AI Microcredential Program and co-develop Module 2 with Rebaz Kamal, creating learner-facing materials and agent exercises using plain Python, OpenRouter, and Google Colab.

Small Business Development Intern | Summer 2025
Massachusetts Executive Office of Economic Development
- Analyzed market trends, financial information, and business models to support small-business growth planning, resource access, job creation, retention, and capital investment.
- Collaborated with cross-functional teams supporting statewide business incentive and development programs and translated program resources into actionable guidance for businesses.

Venture Capital Extern | Sep to Oct 2024
HP Tech Ventures
- Researched AI-enabled productivity tools, markets, and competitors.
- Sourced a startup aligned with the investment thesis, conducted early-stage diligence, and prepared an investment summary.

Financial Consulting & Analytics Intern | Nov 2025
Girls' LEAP
- Reviewed QuickBooks and treasury information and translated financial records into clearer decision-support information.

Additional Girls' LEAP service: Teaching and mentoring | Board service

Selected Projects

Agentic Analytics Lab | 2026
Flagship portfolio project | Grounded analytics and deterministic evaluation
- Built a Python analytics-agent baseline over synthetic data with dataset-scoped, read-only ClickHouse access, semantic metric guards, and explicit SQL and resource safeguards.
- Created a frozen Q1 to Q6 benchmark with repeated runs and deterministic scoring across task success, tool grounding, latency, cost, and failure analysis to assess added system complexity.
- Maintain reproducibility artifacts, failure diagnostics, Python 3.11 and 3.12 CI, GitHub Actions, and CodeQL security analysis.

Tools: *Python, SQL, ClickHouse, GitHub Actions, CodeQL, Ollama*

Gateway: Agentic Commerce Assurance | 2026
Team hackathon prototype | Glasswing Ventures Hackathon
- Contributed UX/UI to a merchant-facing agent-assurance prototype, helping shape workflows for agent tests, replay evidence, findings, recommendations, and retesting.
- Implemented and tested auth/session protection in a separate, unmerged pull request using TypeScript, Next.js, React, Playwright, and build/typecheck validation.

Tools: *Next.js, React, TypeScript, Playwright*

HomeOps Agent | 2026
Portfolio project | Human-in-the-loop workflow automation
- Built a deterministic Good Night Check with explicit tool contracts and a Strands adapter to inspect simulated smart-home state and complete bounded, low-risk actions.
- Requires human approval before safety-sensitive actions and records an audit trail for tool use and decisions.
- Added automated regression tests for deterministic safety behavior, tool traces, and device-failure handling.

Tools: *Python, Strands Agents SDK, deterministic testing*

Technical Skills

Programming & Web: Python, SQL, TypeScript, HTML/CSS, React, Next.js
Agent Systems: MCP, tool invocation, multi-step workflows, structured outputs, deterministic guardrails, human-in-the-loop controls
Data / Infrastructure: ClickHouse, Docker, Git/GitHub, Ollama
Testing / Quality: Python testing, Playwright, GitHub Actions, CodeQL, regression testing, reproducibility, failure analysis
Workflow Systems: Notion, Google Drive, Asana

Writing & Speaking

AI-Powered Personal Branding: A Coaching Toolkit for Career Advisors Author | UMass Boston ScholarWorks | 2026
AI in Education: The Skills Gap Students Are Already Solving Themselves Solo Presenter | UCTLT 2026 | UMass Boston
Spring AI 2026 Workshop and Speaker Series Report Co-author | UMass Boston ScholarWorks | 2026
UMass Boston Department Chairs' Retreat Student presentation | 2025

Leadership & Recognition

Member Paul English Applied AI Institute Student Advisory Council
3rd Place Paul English Applied AI Institute Hackathon | 2024
AI Workshop Leadership Multi-week Summer 2026 series for 30+ career advisors
